

Introducing... CivilWorksInc²

Tyler W. Johnson, Business Development Professional, hard at work for you!

CivilWorksInc² proudly announces the addition of **Tyler W. Johnson** as Business Development Professional. Tyler graduated from Southern University in 1994 with a Bachelor in Science degree in Business Administration with an emphasis in "Marketing".

When hired by water well pump distributor, Delco Western, in 1995 in Salt Lake City as Marketing/Sales Manager/Purchaser, Tyler handled a vast array of duties, including managing sales, designing sales incentive "reward" programs, and developing marketing and financial plans for manufacturers and customers. In addition, Tyler worked closely with civil engineers and municipalities to develop, design, and specify projects. He was instrumental in assembling and submitting bids and proposals to engineers, municipalities, and end-users; and Tyler assumed responsibility for maintaining and purchasing a large inventory and collecting monies owed to the company.

In 2000, Tyler also joined Utah Groundwater Association as Vice President of Conventions. He aptly coordinated conventions and programs for over 100 companies, which included arranging speakers, activities, and displays.

As Business Development Professional, Tyler will seek and sign new clients for CivilWorksInc². His broad knowledge and expertise in the civil engineering industry, paired with his marketing and sales management skills, will enable him to make the perfect "match" between clients' needs and our services.

Tyler, his wife, Dana, and his 2 young children, Phoenix and Gage, are delighted to call Southern Nevada home; and CivilWorksInc² is glad they did!

"Sensible" Solutions...

Timeliness, Accuracy, and Budget are the critical watchwords in the provision of civil engineering services.

CivilWorksInc² focuses on these areas when providing our services for the preparation and delivery of drawings for the processing and construction of new projects and change of scopes alike.

"**Timeliness**" means within (20) days of authorization a "Complete" set of Engineering Plans including: Topographic & Boundary Surveys, Horizontal Control, Grading, Utility, Sections, and related Details are ready for necessary Public Works review and approvals.

In addition, Timeliness is the ability to coordinate with Public Works' various departments including: Land Development, Flood Control, Traffic, and Fire, as well as, the (04) Utility entities.

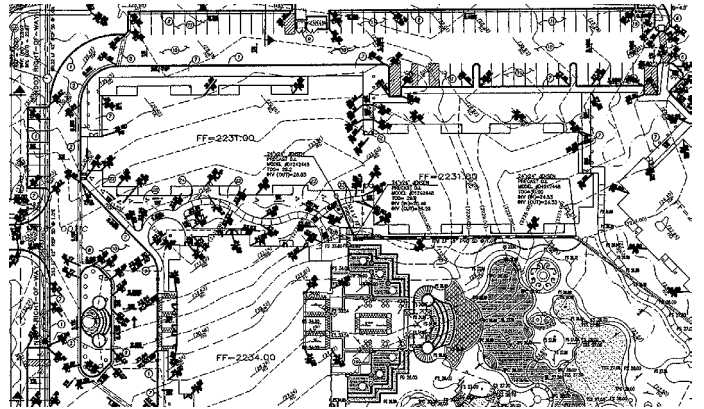

"**Accuracy**" to us includes the attention to Dimension, Calculation, and Detail necessary for the development and construction of a "**Commercial Pad**" facility.

"**Budget**", by our definition, provides for positive review, research, and analysis of your project to ensure maximum value for the least cost.

Tailored to your "Specific" needs...

Business Development Professional. With over (9) years of civil engineering experience working in the West, Tyler W. Johnson is relentless in his pursuit of total client satisfaction.

CivilWorksInc² has an exceptional understanding of our clients and their unique needs, and has an energy and dedication to help you succeed

Prototype grading plan for Tahiti Village, located on Las Vegas Blvd. near Warm Springs Road in Las Vegas, Nevada.

Clients can depend upon him as though part of their own staff. Greg will work closely with the client, the client staff, and CivilWorksInc project managers to ensure your needs are communicated, understood, and met.
